It does. I think that's good news:)

OK I have a good answer. The 56 ppm and the 20 ppm from the report you just sent in Pile 1 were the "validated" results from the original samples collected. The additional excavations that we did in Pile 1 from those locations were based on the "preliminary" results of the original data, not the validated results. So as you know, we went back in and collected those samples again (in the areas with 56ppm and 20ppm), and those samples were sent to the lab, still waiting for results. In the interim, those validated results came in, and may have caused some confusion from Pile 1. [REDACTED] has still not received the preliminary results from those 2 additional excavations, so until that data comes back, we don't need to re-excavate anything else in Pile 1!

I hope this makes sense ☺!
Don

Subject: 49202 - Validated Electronic Data for Shiloh Church Road

Dear Christine,

Attached to this message you will find electronic files containing the validation report and validated data for the Shiloh Church Road site, Case # 49202, SDG C0BZ8. The validation of this case was completed by the Region III Environmental Services Assistance Team (ESAT).

Please contact ESAT's RPO, Eric Graybill by phone at 410-305-2665 or e-mail at Graybill.Eric@epa.gov if additional assistance is needed.
